

# YOU Have Been Exposed!

## If you use rental shop towels

at your workplace, chances are you or your co-workers may have been exposed to unacceptable levels of toxic heavy metals. We're talking lead. Cadmium. Antimony. The kind of nasty stuff that can lead to health problems ranging from headaches to reproductive effects and even cancer.

Why wipe with hazards like lead and cadmium, when you can use a clean towel every time with WYPALL\* Wipers?

*The Consumer Product Safety Commission recognizes the danger of lead to children, but it also presents a danger to adults. Lead can be found in many surprising places, including shop towels that employees use to wipe their hands. Those same hands hold sandwiches at lunch and hug children at the end of the day. Isn't it time to control all the unnecessary sources of lead exposure in the workplace?*

### HAND-TO-MOUTH

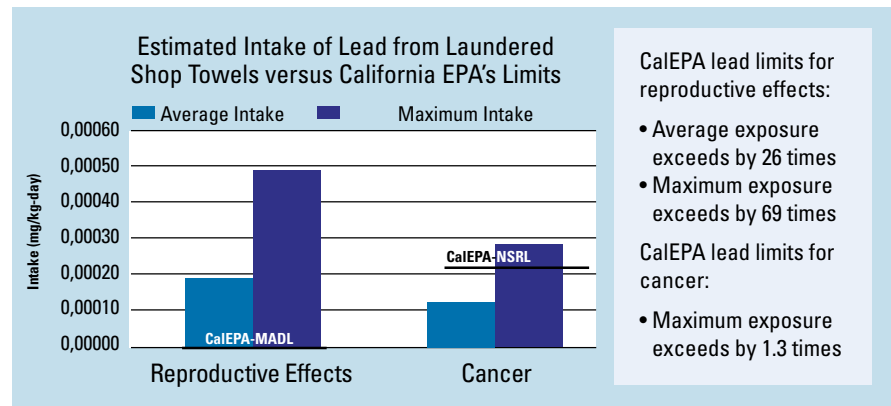

Research proves it. The Gradient Corporation, an independent environmental lab, tested freshly laundered shop towels from 23 different industrial sites and the results were shocking. Even after laundering, rental shop towels contained elevated levels of toxic heavy metals like lead, cadmium and antimony, iron, oil and grease.

What's even more troubling is that these dangerous metals don't necessarily stay on the rental shop towels. These dangerous metals can migrate to workers' hands, where they can be ingested. That's the kind of work you don't want to bring home with you at the end of the day!

### GET THE LEAD OUT

WYPALL\* Wipers are manufactured without chemical binders or other agents that can potentially harm workers and compromise work processes. They do the job without exposing users to dangerous levels of lead and other heavy metals. With WYPALL\* Wiping Solutions, you get a fresh, clean, disposable wiper without heavy metal residues or metallic shards that can scratch the skin or even damage the finished product.

WYPALL\* Wipers offer more of what you need and less of what you don't need:

- Ideal for heavy wiping, prepping surfaces with solvents, and cleaning metal shavings or rough surfaces.
- Pound for pound, WYPALL\* Wipers absorb more water and oil than clean rental shop towels.
- Guaranteed more cost-effective than rental shop towels or rags.
- Safe and environmentally preferable disposal options are available.
- Available in a variety of weights and dispensing options to meet a variety of needs.
- Specialty wiping solutions available for labs and cleanrooms.

### DON'T TAKE CHANCES

Even using just 2.5 shop towels per day may put workers at risk. Don't expose yourself or others to workplace illness. Avoid the risk of taking dangerous elements out of the workplace, exposing those in your home and elsewhere. And don't rely on yesterday's solution to keep you safe from today's workplace risks.

Choose WYPALL\* Wiping Solutions: tough, safe and without the worry and potential harm of rental shop towels.

Do it today. Your health, safety and productivity are too important to risk.

## Ready to get the lead out? **Let's get it done.**

**Chew on this:** Research shows that rental shop towels can retain high levels of toxic heavy metals like lead, cadmium and antimony – even after washing. And these toxins don't stay on the towel. They migrate to your hands and mouth.

**The solution:** switch to a fresh WYPALL\* Wiper – convenient, safely disposable, and guaranteed more cost-effective than rental shop towels or rags.

**LET US PROVE IT.** Together, we can achieve a higher level of protection, cost-savings and productivity. For your **FREE** Site Survey, enter promo code ISHN810 at [www.kcproveit.com](http://www.kcproveit.com)
